

STAR PROGETTI Outdoor specialists

Since 1993 the way of exploiting outdoor spaces has changed, generating new business.

The company's innovative ideas and solutions have created a new trend, a new way of exploiting outdoor space and increasing business. The company's idea has been a resounding success throughout Europe. Architects and operators have greatly appreciated the OASIdehor® MultiSystem and consider it a real plus for outdoor furnishing.

Star Progetti has been producing gas infrared and electric Helios® Radiant heating systems for indoor and outdoor use since 1993. Complete OASIdehor® installations with these effective heating systems.

THE COMPANY PRODUCES UNDER THE UNI EN ISO 9001:2000 QUALITY SYSTEM.

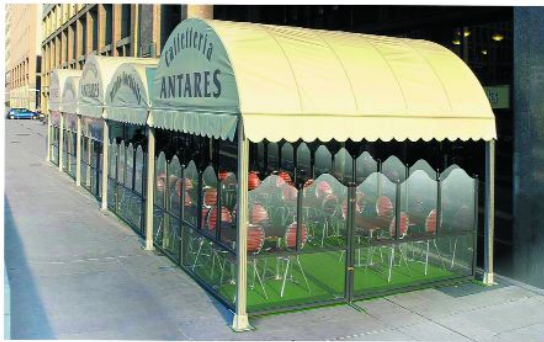

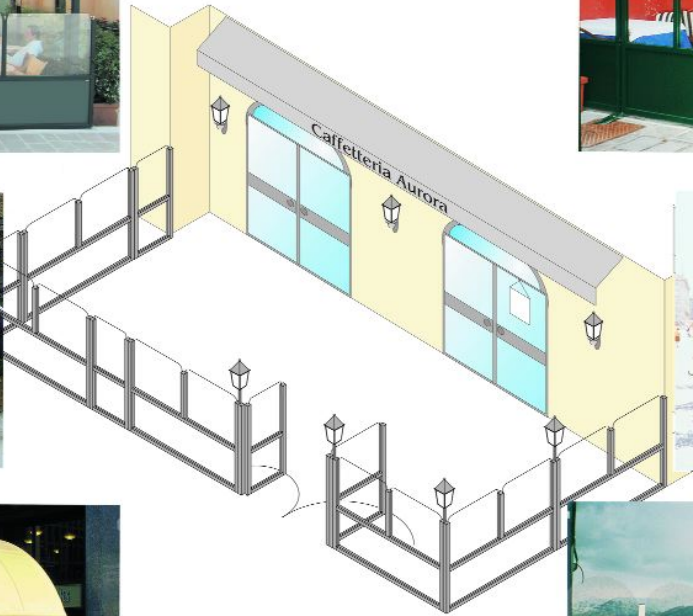

Design

Star Progetti's designers have developed different structures and models to meet the design needs of Urban Furnishing projects.

The technical solutions adopted, ease of installation and flexibility of the system are exclusive features of OASIdehor®.

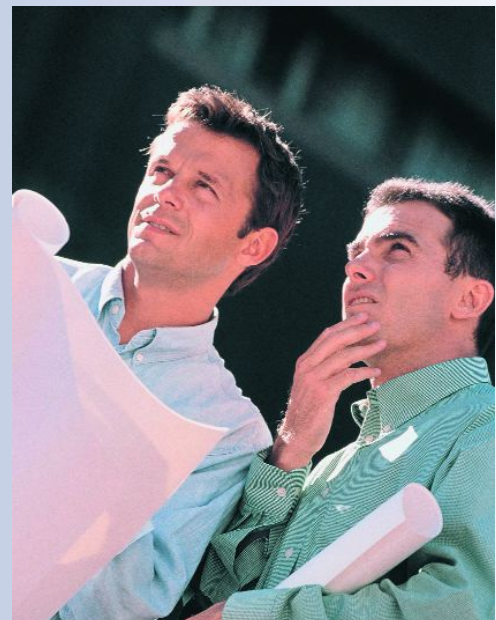

The client and the Project

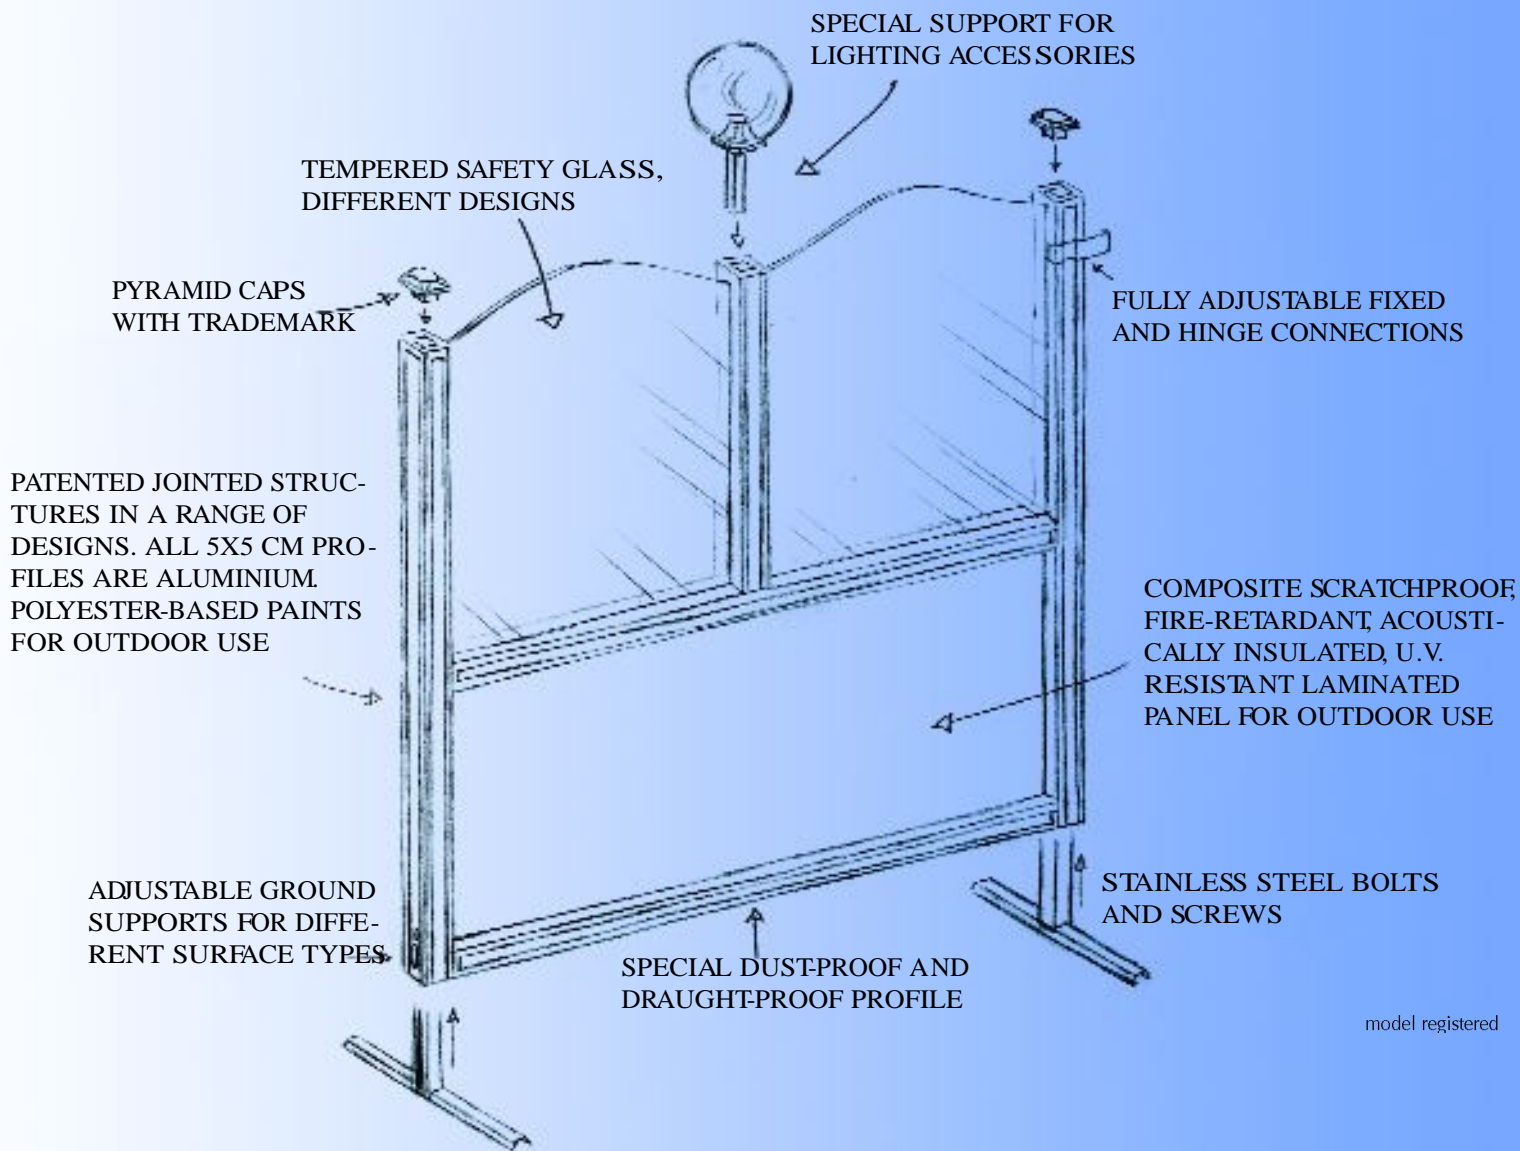

Star Progetti's sales staff and its authorised distributors will come to visit you, offer consultancy and define the project, and help with the technical documents requested by the Local Authorities. During this stage, special needs can be identified, the best personalised solution found with the client and a final three dimensional project prepared.

Delivery and installation

The OASIdehor® MultiSystem is easy to install. On request the system can be installed by Star Progetti's technicians or directly by the client following the instructions and using tools provided.

OASIdehor® - an international success since 1997

Exclusive

The OASIdehor® MultiSystem is designed and produced with removable or permanent modules available in a range of sizes, colours, shapes, and modular elements to create personalised, prestigious spaces that can be changed over time. OASIdehor® uses high quality materials and finishes to withstand severe weather conditions and last for many years.

Patented jointed structure

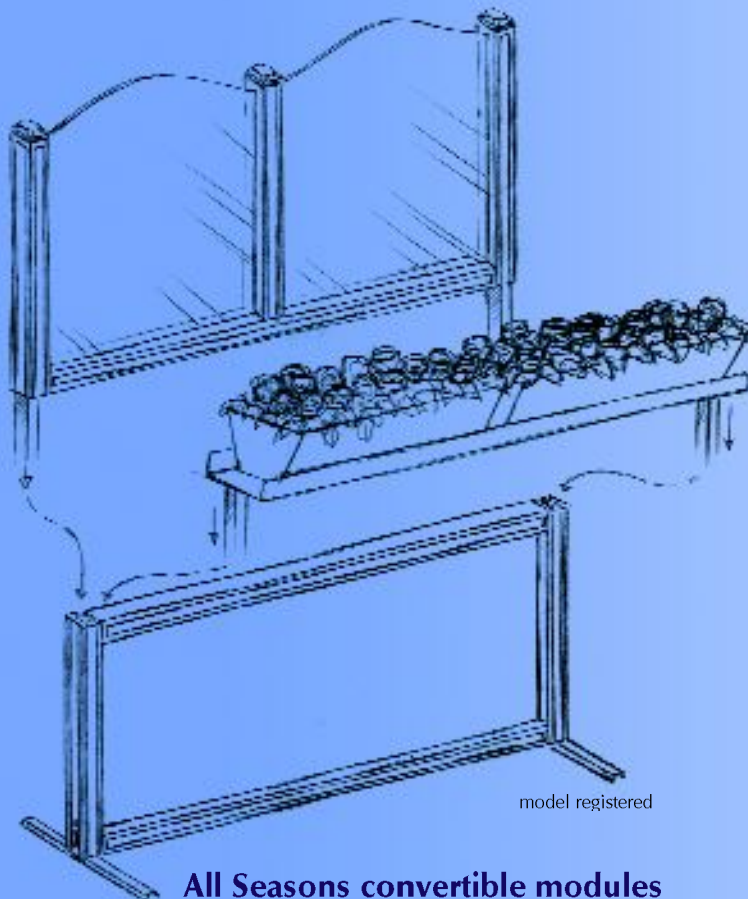

The patented jointed structure creates an elegant continuity of the lines and enhances its robustness. The 5x5 cm sturdy aluminium is painted with polyester paints, oven-treated and U.V. resistant. All elements and bolts and screws are stainless steel. No steel-iron components.

Safety glass

In compliance with law, the thick, thermal Tempered Safety Glass panels have perfectly rounded edges, guaranteeing utmost safety. A range of designs is available.

Lower panel - class 1

The lower panel of OASIdehor® is a special fire-retardant, acoustically insulated composite section resistant to all weather, saline and ultraviolet conditions. The colour is indelible. The lower panel is available in either plain or glazed glass on request.

Seals

The window and panel seals are in top quality India rubber for long-life. Elegant black plugs with the OASIdehor® trademark close the ends of the sections.

Support accessories

Special adjustable telescopic supports are used. These supports allow OASIdehor® to be installed on any type of ground or floor conditions.

Connections

Specially designed connections allow rapid straight, right-angled or hinged assembly of the modules. With these connections it is possible to create doors and openings wherever needed and to change them as required.

Maintenance

Maintenance is easy and effortless! The OASIdehor® modules can be power washed because they do not contain steel-iron parts and so will not rust.

Stability and safety

The stability of the modules has been tested to guarantee utmost safety of the installation.

WARRANTY

The OASIdehor® MultiSystem is supplied with a **5 ans** warranty.

OASIdehor® increases seating capacity, image...

OASIdehor® a great deal

Outdoor furnishing is the key to your business's image, drawing customers and enticing them to enter. The OASIdehor® MultiSystem allows you to use your outdoor spaces all year round, creating prestigious areas which project the image of your premises outdoors. With these outdoor areas you can increase seating capacity and thus turnover. The OASIdehor® MultiSystem has been successfully used throughout Europe.

OASIdehor® and H.A.C.C.P.

OASIdehor® offers your customers hygiene, as envisaged in H.A.C.C.P. standards, protecting them from smog, wind, noise and pick-pockets. Create new indoor and outdoor smoking and non-smoking areas easily with OASIdehor®.

and business by more than 60%*

OASIdehor® flexibility

OASIdehor® can expand over time; the modules fit together easily to meet current needs, altering your outdoor spaces as required. OASIdehor® can be assembled and taken down in just a few minutes also by non-experts. The remarkably flexible OASIdehor® allows you to furnish your outdoor areas with fixed walls, removable walls, openings and doors with special hinges. Logos and figures can be applied to the panels or glass to give your business an even more striking and prestigious image.

OASIdehor® and Urban furnishing

The Urban Furnishing Managers of the main European cities authorised the installation of the OASIdehor® MultiSystem several years ago. Their choice was due to the unique characteristics of the various designs which blend in harmoniously with the different styles of the buildings and old city centres. Another important reason for their choice is that the system can be removed, breaking down barriers for Local Authorities and users. Special models can be designed for specific Urban Furnishing projects.

OASIdehor® Standard Line

Standard Line is Star Progetti's first design, launched in 1997, and is currently the biggest seller on all the international markets. The thousands of OASIdehor® systems installed over the years testify to the long-life, sturdiness and quality of OASIdehor® MultiSystem.

Standard Line

The Standard Line is denoted by the simplicity of the structure. A smooth, parallelepiped which adapts to any furnishing situation. Available in 6 models with different shaped glass panels. Sturdy 5x5 cm aluminium profiles.

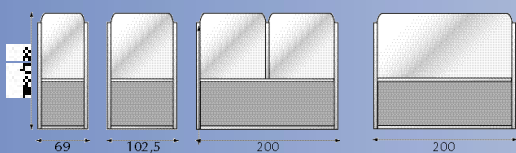

The Standard Line models:

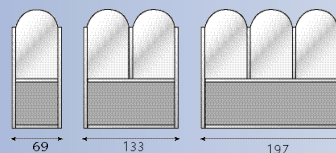

- Roma: with large, high protection glass and rounded corners
- Venezia: with arch glass
- Milano: with glass and upper edging

All models are available with lower panel in safety glass; glazed safety glass also available. The modules are available in the following heights: 150 cm and 180 cm; other sizes available on request.

OASIdehor® Elegance Line

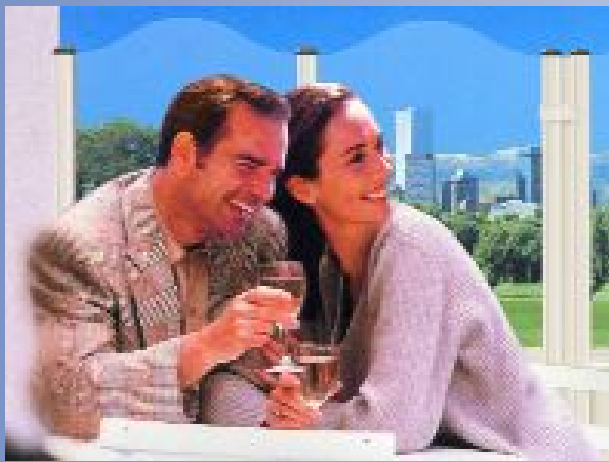

The Elegance line was designed to adapt to and meet all exterior design needs. The special patented profile with rounded edges follows the latest trends in international design. Curvilinear, aesthetically pleasing shapes which, in the range of colours available, fulfil even the most demanding furnishing requirements. The technical features and accessories available allow any problem to be solved, even in the design of the most difficult outdoor conditions. The new, patented shapes make OASIdehor® Elegance unique, exclusive and incomparable.

Elegance Line

The Elegance Line has curvilinear, aesthetically pleasing shapes, just like the latest trends in international design. The sturdy aluminium 5x5 cm structure has rounded, shaped edges and elegant finishes.

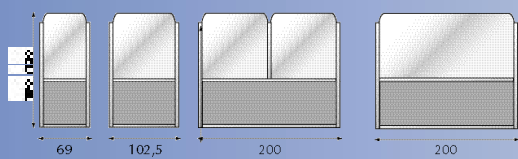

The Elegance Line models:

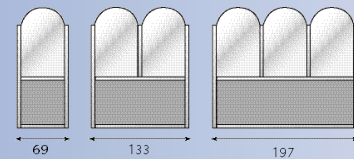

- Roma: with large, high protection safety glass and rounded corners
- Venezia: with "arch" safety glass
- Firenze: with "wave" safety glass

All models are available with lower panel in safety glass; glazed safety glass also available. The modules are available in the following heights: 150 cm and 180 cm; other sizes available on request.

OASIdehor® Retrò Line

OASIdehor® Retrò, an exclusive model which revisits the classical styles of the past. A modular elegant structure for bars and restaurants which adapts to different environmental, architectonic conditions and Urban Furnishing upgrading projects. An elegant and useful extension to your business.

The romantic octagon

The patented octagonal jointed structure creates a harmonious, linear effect. The pyramidal elements with brass sphere, rounded shiny glass connections and wave glass make this an elegant structure, recalling the classical and romantic shapes of bygone days.

Retrò Line

A design which recalls the classical styles of bygone days. The 5x5 cm octagonal structure has vertical beading and is embellished with elegant accessories and brass finishes.

The Retrò Line models:

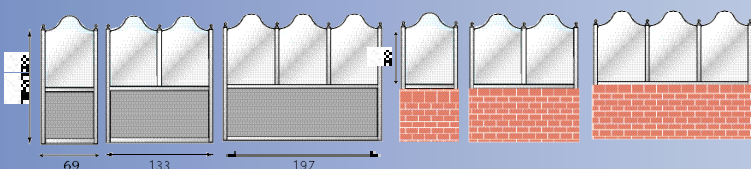

- Retrò glossy green RAL 6005
- Retrò scratchproof moss green with "marble effect" lower panel
- Retrò scratchproof micaceous iron
- Oasiwood Retrò with "cherry wood effect" profiles and lower safety glass panel. The strength of aluminium combined with the elegance of wood

All models are available with lower panel in safety glass; glazed safety glass also available. The modules are available in the following heights: 159 cm and 180 cm; other measurements available on request.
